Subject Index

Advanced ceramic
  related chemical themes in the synthesis of advanced ceramic materials, 261
Agglomerates
  characterization of agglomerates by ceramic powder compaction, 271
Alkoxides
  particular-shaped powders obtained by modification of aluminium and zirconium alkoxides, 227
Alloys
  interaction of ceramic cutting tools with nickel-based alloys, 379
Aluminium
  aluminium nitride by carbothermal nitridation, 247
  as-grown metal oxides and electron-irradiated Al_2O_3 studied by positron lifetime measurements, 161
  characterization of the microstructure of sintered AlN by transmission electron microscopy, 157
  effect of composition, phase content and microstructure on the performance of yttrium Si–Al–O–N ceramics, 341
  effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
  influence of additives on the microstructural development of mullite–ZrO_2 and alumina–ZrO_2, 139
  ion beam mixing of Al_2O_3–Cu interfaces for enhanced adhesion, 83
  microstructural changes in alumina during hot isostatic pressing, 37
  microstructure of zirconia-toughened alumina obtained through different precursor routes, 53
  particular-shaped powders obtained by modification of aluminium and zirconium alkoxides, 227
  pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
  the influence of porosity on the thermal diffusivity of gamma-aluminate ceramics, 153
Ammonia
  preparation of silicon oxynitride and nitride by nitridation of amorphous silica in ammonia, 265
Annealing
  ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311

Barium
  effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
  influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 325
  ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311
  superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317
  the chemistry and properties of grain boundaries in chemically thinned $Y_1Ba_2Cu_3O_{7-x}$, 293
  the rate of oxygen gain in $YBa_2Cu_3O_{7-x}$ exposed to air, 329
  $YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321
Bismuth
  characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
  electrical properties of bismuth-doped non-stoichiometric strontium titanate ceramics, 183
Boron
  effect of cation non-stoichiometry and of process parameters on properties of YBCO, 299
Borosilicate glasses
  borosilicate glass reinforced with continuous silicon carbide fibres: a new engineering ceramic, 363

Caerium
  features of the caeria–zirconia system, 121
Calcium
  characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
Capacitors
  conception of electronic ceramics in relation to their functional reliability: applications to multilayer ceramic capacitors and semiconductor ceramics, 113
Carbon
  aluminium nitride by carbothermal nitridation, 247
  borosilicate glass reinforced with continuous silicon carbide fibres: a new engineering ceramic, 363
  carbon behavior in sintered silicon nitride grain boundaries, 89
  effect of cation non-stoichiometry and of process parameters on properties of YBCO, 299
  hot-pressed Si_3N_4–SiC whisker composites, 357
  organo-metallic chemical vapour deposition of silicon-rich amorphous Si_xC_{1-x} refractory layers using $SiEt_4$ as a single source, 69
  studies on the strengthening of silicon carbide-based multiphase ceramics
    I: The SiC–TiC system, 401
Ceramic industry
  technological and productive innovations in the ceramic industry with particular reference to ceramic floor and wall tiles, 417
Chemical vapour deposition
  organo-metallic chemical vapour deposition of silicon-rich amorphous Si_xC_{1-x} refractory layers using $SiEt_4$ as a single source, 69
Cobalt
  effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
  the influence of cobalt on the electrical characteristics of ZnO ceramics, 201

Composites
behaviour of titanium in mullite–zirconia composites, 61
ceramic-fiber–polymer composites for electronic substrates, 207
electrical discharge machinable ceramic composites, 351
hot-pressed Si_3N_4–SiC whisker composites, 357
reaction-sintered ZrO_2–mullite composites, 105
Copper
characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
copper–cordierite cosintering, 77
influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 325
ion beam mixing of Al_2O_3–Cu interfaces for enhanced adhesion, 83
ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311
new oxygen-deficient perovskite phase in the $La_{1-x}Sr_x$-CuO_{3-y} system, 307
superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317
the chemistry and properties of grain boundaries in chemically thinned $Y_1Ba_2Cu_3O_{7-x}$, 293
the rate of oxygen gain in $YBa_2Cu_3O_{7-x}$ exposed to air, 329
$YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321
Cordierite
copper–cordierite cosintering, 77
studies on synthesis and sintering of cordierite, 253
Cosintering
copper–cordierite cosintering, 77
Crystallization
influence of sol–gel processing on the morphology and crystallization of Mg_2TiO_4 powders, 221
Cutting tools
interaction of ceramic cutting tools with nickel-based alloys, 379

Dielectrics
degradation of dielectric ceramics, 171
effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
Electrical discharge
electrical discharge machinable ceramic composites, 351
Electronic ceramics
chemical processing for electronic ceramics: a challenge, 233
conception of electronic ceramics in relation to their functional reliability: applications to multilayer ceramic capacitors and semiconductor ceramics, 113
Engineering ceramics
borosilicate glass reinforced with continuous silicon carbide fibres: a new engineering ceramic, 363
mechanical properties of engineering ceramics: test bars *versus* components, 131

Gas turbines
slip-cast hot isostatically pressed silicon nitride gas turbine components, 373
Grain boundaries
carbon behavior in sintered silicon nitride grain boundaries, 89
the chemistry and properties of grain boundaries in chemically thinned $Y_1Ba_2Cu_3O_{7-x}$, 293

Hot isostatic pressing
microstructural changes in alumina during hot isostatic pressing, 37
slip-cast hot isostatically pressed silicon nitride gas turbine components, 373
Hot-pressing
hot-pressed Si_3N_4–SiC whisker composites, 357

Injection moulding
systematic development of the ceramic injection moulding process, 17
Ion beam mixing
ion beam mixing of Al_2O_3–Cu interfaces for enhanced adhesion, 83
Ion implantation
ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311

Lanthanum
new oxygen-deficient perovskite phase in the $La_{1-x}Sr_xCuO_{3-y}$ system, 307
Lithium
titanium-implanted optical waveguides in $LiNbO_3$, 189
Lubrication
the influence of lubrication on ceramic and steel sliding contacts, 407

Magnesium
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
influence of sol–gel processing on the morphology and crystallization of Mg_2TiO_4 powders, 221
Milling
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
process of fine milling for ceramic materials, 3
Mullite
behaviour of titanium in mullite–zirconia composites, 61
influence of additives on the microstructural development of mullite–ZrO_2 and alumina–ZrO_2, 139
reaction-sintered ZrO_2–mullite composites, 105
Multiphase ceramics
studies on the strengthening of silicon carbide-based multiphase ceramics
I: The SiC–TiC system, 401

Nickel
interaction of ceramic cutting tools with nickel-based alloys, 379
Niobium
titanium-implanted optical waveguides in $LiNbO_3$, 189
Nitridation
aluminium nitride by carbothermal nitridation, 247
preparation of silicon oxynitride and nitride by nitridation of amorphous silica in ammonia, 265
Nitrogen
aluminium nitride by carbothermal nitridation, 247
biaxial stress rupture of silicon nitride, 147
carbon behavior in sintered silicon nitride grain boundaries, 89
characterization of the microstructure of sintered AlN by transmission electron microscopy, 157

effect of composition, phase content and microstructure on the performance of yttrium Si–Al–O–N ceramics, 341
hot-pressed Si_3N_4–SiC whisker composites, 357
oxidation processes in silicon-nitride-based ceramics, 389
preparation of silicon oxynitride and nitride by nitridation of amorphous silica in ammonia, 265
pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
processing of silicon nitride ceramics, 27
slip-cast hot isostatically pressed silicon nitride gas turbine components, 373

Optical waveguides
titanium-implanted optical waveguides in $LiNbO_3$, 189

Oxidation
oxidation processes in silicon-nitride-based ceramics, 389

Oxygen
acid–basic stability of Y-TZP ceramics, 97
as-grown metal oxides and electron-irradiated Al_2O_3 studied by positron lifetime measurements, 161
behaviour of titanium in mullite–zirconia composites, 61
characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
effect of cation non-stoichiometry and of process parameters on properties of YBCO, 299
effect of composition, phase content and microstructure on the performance of yttrium Si–Al–O–N ceramics, 341
effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
electrical properties of bismuth-doped non-stoichiometric strontium titanate ceramics, 183
features of the caeria–zirconia system, 121
fumed oxides as base materials for ceramic applications, 243
influence of additives on the microstructural development of mullite–ZrO_2 and alumina–ZrO_2, 139
influence of sol–gel processing on the morphology and crystallization of Mg_2TiO_4 powders, 221
influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 325
ion beam mixing of Al_2O_3–Cu interfaces for enhanced adhesion, 83
ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311
microstructural changes in alumina during hot isostatic pressing, 37
microstructure characteristics of ultra-fine ZrO_2–Y_2O_3 ceramic powders, 215
microstructure of zirconia-toughened alumina obtained through different precursor routes, 53
new oxygen-deficient perovskite phase in the $La_{1-x}Sr_x$-CuO_{3-y} system, 307
preparation of silicon oxynitride and nitride by nitridation of amorphous silica in ammonia, 265
pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
reaction-sintered ZrO_2–mullite composites, 105
solution routes to synthesize superconducting oxides, 289
superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317
the chemistry and properties of grain boundaries in chemically thinned $Y_1Ba_2Cu_3O_{7-x}$, 293
the influence of cobalt on the electrical characteristics of ZnO ceramics, 201
the influence of porosity on the thermal diffusivity of gamma-aluminate ceramics, 153
the rate of oxygen gain in $YBa_2Cu_3O_{7-\delta}$ exposed to air, 329
titanium-implanted optical waveguides in $LiNbO_3$, 189
$YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321

Perovskites
effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
new oxygen-deficient perovskite phase in the $La_{1-x}Sr_x$-CuO_{3-y} system, 307

Plasma polymerization
$YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321

Polymers
ceramic-fiber–polymer composites for electronic substrates, 207

Pore formation
non-uniformities and pore formation, 9

Porosity
the influence of porosity on the thermal diffusivity of gamma-aluminate ceramics, 153

Positron lifetime
as-grown metal oxides and electron-irradiated Al_2O_3 studied by positron lifetime measurements, 161

Powder compaction
characterization of agglomerates by ceramic powder compaction, 271

Raman spectroscopy
characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337

Semiconductors
conception of electronic ceramics in relation to their functional reliability: applications to multilayer ceramic capacitors and semiconductor ceramics, 113

Silane
organo-metallic chemical vapour deposition of silicon-rich amorphous Si_xC_{1-x} refractory layers using $SiEt_4$ as a single source, 69

Silicon
biaxial stress rupture of silicon nitride, 147
borosilicate glass reinforced with continuous silicon carbide fibres: a new engineering ceramic, 363
carbon behavior in sintered silicon nitride grain boundaries, 89
effect of composition, phase content and microstructure on the performance of yttrium Si–Al–O–N ceramics, 341
hot-pressed Si_3N_4–SiC whisker composites, 357
organo-metallic chemical vapour deposition of silicon-rich amorphous Si_xC_{1-x} refractory layers using $SiEt_4$ as a single source, 69

oxidation processes in silicon-nitride-based ceramics, 389
preparation of silicon oxynitride and nitride by nitridation of amorphous silica in ammonia, 265
pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
processing of silicon nitride ceramics, 27
slip-cast hot isostatically pressed silicon nitride gas turbine components, 373
studies on the strengthening of silicon carbide-based multiphase ceramics
I: The SiC–TiC system, 401

Single crystals
ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311

Sintering
carbon behavior in sintered silicon nitride grain boundaries, 89
characterization of the microstructure of sintered AlN by transmission electron microscopy, 157
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
reaction-sintered ZrO_2–mullite composites, 105
studies on synthesis and sintering of cordierite, 253

Steel
the influence of lubrication on ceramic and steel sliding contacts, 407

Stress
biaxial stress rupture of silicon nitride, 147

Strontium
characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
electrical properties of bismuth-doped non-stoichiometric strontium titanate ceramics, 183
new oxygen-deficient perovskite phase in the $La_{1-x}Sr_x$-CuO_{3-y} system, 307

Superconductors
characterization of Bi–Sr–Ca–Cu–O superconducting materials by Raman spectroscopy, 337
new trends in the crystal chemistry of high-T_c superconductors, 281
solution routes to synthesize superconducting oxides, 289
superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317

Technical ceramics
upgrading technical ceramics, 45

Thermal diffusivity
the influence of porosity on the thermal diffusivity of gamma-aluminate ceramics, 153

Thin films
influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 335
superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317
$YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321

Tiles
technological and productive innovations in the ceramic industry with particular reference to ceramic floor and wall tiles, 417

Titanium
behaviour of titanium in mullite–zirconia composites, 61
effect of solid solution between barium titanate and cobalt-based perovskites on dielectric properties, 193
electrical properties of bismuth-doped non-stoichiometric strontium titanate ceramics, 183
influence of sol–gel processing on the morphology and crystallization of Mg_2TiO_4 powders, 221
studies on the strengthening of silicon carbide-based multiphase ceramics
I: The SiC—TiC system, 401
titanium-implanted optical waveguides in $LiNbO_3$, 189

Transmission electron microscopy
characterization of the microstructure of sintered AlN by transmission electron microscopy, 157

Yttrium
acid–basic stability of Y-TZP ceramics, 97
effect of cation non-stoichiometry and of process parameters on properties of YBCO, 299
effect of composition, phase content and microstructure on the performance of yttrium Si–Al–O–N ceramics, 341
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 325
ion implantation and thermal annealing of high-T_c single crystals of $YBa_2Cu_3O_x$, 311
microstructure characteristics of ultra-fine ZrO_2–Y_2O_3 ceramic powders, 215
pressureless sintering of silicon nitride with additives of the Y_2O_3–Al_2O_3–SiO_2 system, 395
superconducting weak link in $YBa_2Cu_3O_{7-\delta}$ ceramic films, 317
the chemistry and properties of grain boundaries in chemically thinned $Y_1Ba_2Cu_3O_{7-x}$, 293
the rate of oxygen gain in $YBa_2Cu_3O_{7-x}$ exposed to air, 329
$YBa_2Cu_3O_x$ thin films coated by plasma polymerization, 321

Zinc
the influence of cobalt on the electrical characteristics of ZnO ceramics, 201

Zirconium
acid–basic stability of Y-TZP ceramics, 97
behaviour of titanium in mullite–zirconia composites, 61
effect of Y_2O_3 and MgO contaminants introduced by Y-TZP and Mg-PSZ milling balls on the sintering of Al_2O_3 powders, 101
features of the caeria–zirconia system, 121
influence of additives on the microstructural development of mullite–ZrO_2 and alumina–ZrO_2, 139
influence of Y_2O_3–ZrO_2 buffer layers on sputtered films of $YBa_2Cu_3O_{6+x}$, 325
microstructure characteristics of ultra-fine ZrO_2–Y_2O_3 ceramic powders, 215
microstructure of zirconia-toughened alumina obtained through different precursor routes, 53
particular-shaped powders obtained by modification of aluminium and zirconium alkoxides, 227
reaction-sintered ZrO_2–mullite composites, 105
